Crown Knots

Original Drawing By
Geoffrey Budworth

...are best learnt using 6 strands.

Note how, in a regular over-one-under-one Crown Knot (fig's (a) & (b)), the 6th. or last strand is a

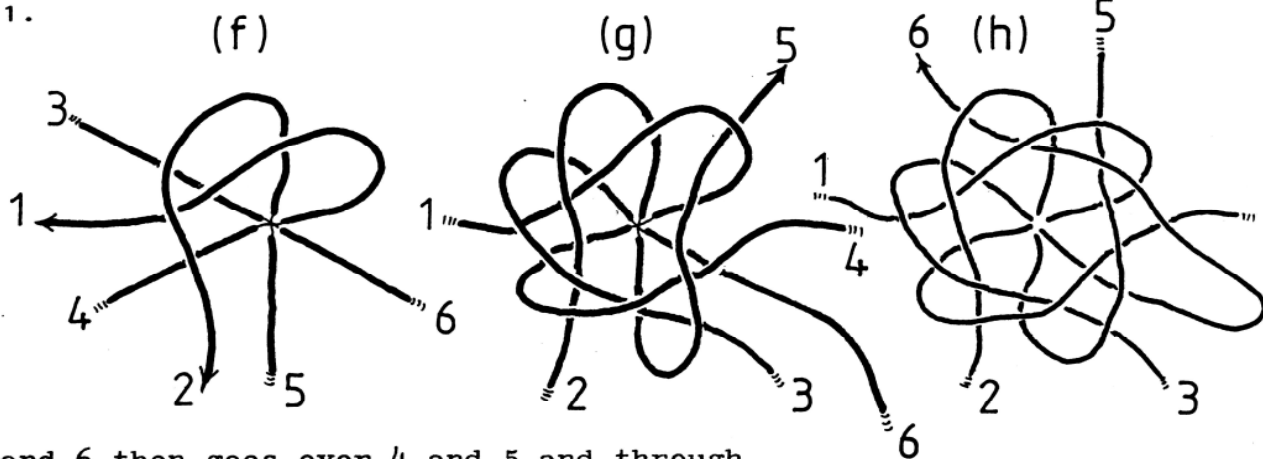

"locking" strand holding the whole arrangement together. A 3-strand Crown Knot (fig. (c)) starts a 3-strand rope back splice.

Fancywork almost always requires an over-two-under-two Crown Knot (fig's (d) & (e)).

Learn to tie it first by tying fig. (b). Then simply re-tuck strand 1 alongside 2; 2 alongside 3; 3 alongside 4; etc.

Tie directly as shown in fig's (f) - (h). Note there will be TWO locking strands. Strand 5 passes over 3 and 4, and tucks through the bight formed by 1.

Strand 6 then goes over 4 and 5 and through the bights formed by both 1 and 2.

Chart No.
